

# Looking for Prospective PhD students in the NYU Educational Communication & Technology Program

## Fully-Funded PhD Fellowship Opportunity

I am seeking new PhD students who are passionate about researching the future of technology for education, teaching, and learning. Students who are interested in working with me should feel free to contact me if they have any questions or want to learn more.

**Applications are due December 1, 2016 and admitted students will start in Fall 2017.** <http://steinhardt.nyu.edu/alt/ect/phd/apply/>

Please see links and information in the right-hand box, to learn more about my work, the areas of interest prospective students may bring, and how to apply.

## About the ECT Program and Working with Me

The PhD Program in Educational Communication and Technology prepares researchers who want to design and study the impact of new technology for education and learning. Our faculty come from a variety of fields including the Learning Sciences, Cognitive Science, Communications, Human-Computer Interaction, and Education.

For more information please go to the following:  
<http://steinhardt.nyu.edu/alt/ect/phd/>

NYU has amazing resources for doctoral students including many research centers that focus on technology, learning, and social change including the Media and Games Network (MAGNET), Consortium for Research and Evaluation of Advanced Technologies for Education (CREATE), Center for Urban Science + Progress (CUSP) and many others.

My own projects are varied, and students with many interests may align with current research projects (see right-hand box for areas of interest). I am particularly looking for students who have an interest in design – and using design methodologies to develop new education technology and data tools for teachers and learners.

Students who have a technical background (e.g., computer science, HCI, information science etc.) with an interest in applying their technology perspective to education will be good fits for my work. Finally, students who are interested in school improvement, education policy implementation, and education systems and the role that technology can play in those improvement efforts will find natural opportunities to work on my research projects.

## Professor

Dr. June Ahn  
[http://steinhardt.nyu.edu/faculty/June\\_Ahn](http://steinhardt.nyu.edu/faculty/June_Ahn)  
<http://ahnjune.com/>  
@ahnjune  
[june.ahn@nyu.edu](mailto:june.ahn@nyu.edu)

Interested applicants should feel free to email me. I am happy to answer questions and gauge your fit with my work and our programs at NYU.

## School

New York University  
Steinhardt School of Culture, Education and Human Development

## Areas of Interest

- Learning Technologies
- Learning Sciences
- Human-Computer Interaction
- School Improvement with Technology
- Teaching and Learning with Technology
- Design-based Research
- Data Visualization
- Learning Analytics
- Games and Playful Learning
- Research-Practice Partnerships
- Any other related interests

## How to Apply

Please visit the following site for more information and application instructions.

<http://steinhardt.nyu.edu/alt/ect/phd/apply/>

**Deadline for applications is December 1, 2016**
